

Junior Campus After School is starting at the German International School

Junior Campus is the provider of lessons in the field of science & technology. All lessons are based on inquiry and design learning. In the new school year we will provide a number of after-school activities in the field of science at DISDH! Five blocks will be offered in which the students will work with Science, Biology, Art, Noise and Electricity.

In August we are going to start with the first block, Junior Campus Science Lab!

During the science lessons of Junior Campus, the students will experiment a lot! They learn more about sinking & floating, air and water pressure, static electricity, colors, chemical reactions and gravity. In their Junior Campus logbook they will keep predictions and record what they learn during the lessons.

The lessons are given in Dutch by a Junior Campus teacher and are suitable for students from Klasse 4, 5 and 6. A maximum of 12 children can participate and registration is based on 'first come first serve'. Registration closes on July 31, 2022

When: August 30, September 6, 13, 20, 27, October 4,11
Time: 16.30-17.30
Where: classroom at school
Price: Euro 87,50 for 7 lessons
